

Thank you for downloading your free fine motor rainbow pack from MamaOT.com!

Because some children benefit from visual supports and/or are more motivated to participate in fine motor activities when letters and numbers are involved. I've created five different kinds of rainbow templates for you:

- Blank rainbow
- Rainbow with blank circles (visual guides)
- Rainbow with ABCs
- Rainbow with 123s
- Rainbow with first letter of each color

I've also created three different sizes of each template for you:

- Full page
- Half page (two copies per page)
- Quarter page (four copies per page)

This will allow you to use the rainbows with a variety of materials. The full page rainbows are perfectly sized for Fruit Loops cereal pieces. The smaller sized rainbows will work well for smaller materials such as pony beads or Perler Beads. You could also use these rainbow templates with glue, stickers, play dough, dot markers, colorful washi tape, scissors, and more!

Please provide appropriate supervision and only offer materials that the children in your care can utilize safely.
